## **DETAILED ACTION**

### ***Rejections Repeated***

1. The 35 U.S.C. 103(a) rejection of claims 1-10 unpatentable over Yamaguchi et al. in view of Hachisuka et al. has been repeated as previously made in office action 9/20/07.

### ***Response to Arguments***

2. Applicant's arguments filed 12/20/07 have been fully considered but they are not persuasive.

In response to applicant's argument that Yamaguchi reference teaches away from using a shape memory polymer of the Hachisuka reference in making the porous substrate of the claimed invention, Yamaguchi reference does not teach away from using shape memory polymer, because shape memory polymer is not limited to the characteristics of swelling but can be used to change physical states of material such as from glass state to rubber state (col. 5 lines 10-11). Furthermore, Hachisuka teaches the same materials for the crosslinked second polymer as desired by the applicant and since the same materials used by applicant's claimed invention have the same physical properties as the materials used by Hachisuka, therefore, Hachisuka does not teach away from applicant's claimed invention.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
